

Got a HEAD-SHAKER?

Get a **NOseband**tm

The **NOseband**tm is an innovative product developed by a Registered Veterinary Technician and horse trainer to help control head-shaking from photo-hypersensitivity and other causes. The **NOseband**tm has been tested and approved by equine veterinarians for all disciplines.

The **NOseband**tm works by counter stimulating the facial nerves and may create an endorphin release. This product is now in use by some of the leading event, hunter and dressage trainers worldwide.

There tends to be a residual effect in many horses, allowing one to warm up with the **NOseband**tm and then remove it before competition for disciplines where it is not allowed.

Because the **NOseband**tm is not a medication, there is no prescription necessary and there are no worries about drug testing.

Patent pending.
